

Residential Docking Systems

ENVIRONMENTALLY FRIENDLY . ROBUST . AFFORDABLE . BEAUTIFUL

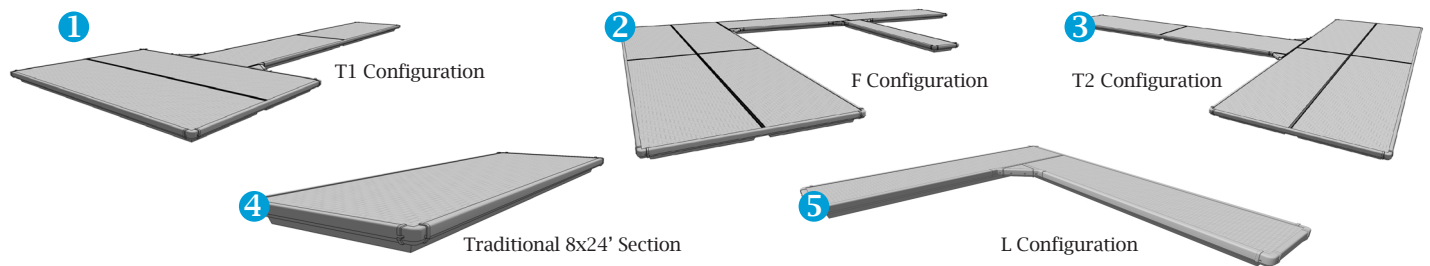

First True Green Residential Dock System

We manufacture the first true “green” residential docking system, comprised of 50%+ recycled materials. Following production, the entire group of components are nearly 100% recyclable.

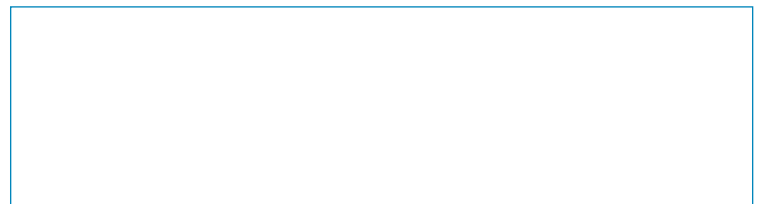

- Strong & durable, built for commercial use
- Priced for residential installations
- Low to zero maintenance
- Designed to last a lifetime
- Custom configurations using our modular components
- Composite components insure no splintering, nail head rising, and you will never have to replace rotting boards, or repaint or stain, ever!
- Simply install and enjoy!

Optional Residential Dock Configurations

The same quality construction that goes into our robust commercial product can also be found in our residential product line. Choose from these configurations or customize one of your own.

Most installations are completed and ready for a lifetime of use the same day! Ask about our unique discount for the first dock installation on your lake or area of the waterway!

WaveMaster Docking Systems, Inc. has developed a proprietary marine docking system, with utility patents pending, domestically and internationally. The WAVEMASTER trademark is the property of WaveMaster Docking Systems, Inc.
